ABSTRACT

As part of a districtwide follow-up study, California's Sacramento City College (SCC) surveyed 2,075 former students from 1993-94 to gather information on student outcomes and characteristics. This report presents findings for the college by academic program. First, a brief discussion of survey methodology is provided, indicating that surveys were sent to all graduates and certificate earners and a random sample of non-returning students who had not graduated; tables showing response rates are presented, indicating that 763 former students responded; and tables of overall responses are provided. Tables of responses are then presented for occupational education programs, including accounting, administrative of justice, aviation maintenance technology, general business, computer information science, dental hygiene, environmental control technology, nursing, occupational therapy assisting, and office administration. Responses are then presented for general programs, including art, general education or transfer/liberal arts, humanities, interdisciplinary studies, and social sciences, and for students with undeclared majors. For each section of responses, data are provided on student demographics, including completion and attendance status, gender, ethnicity, and age; college experience, including objectives and goals, reasons for not re-enrolling, units completed, license examination outcomes, satisfaction with SCC, rating of services, and benefits in terms of career plans; employment information, including student employment in jobs related and unrelated their studies; and continuing education status, including enrollment and transfer status and problems transferring. 1995 Student Follow-up
A Survey of 1993-94 Graduates and Non-Returning Students

In Spring 1995, Follow-up survey questionnaires were sent to former students who had attended a Los Rios college during the 1993-94 academic year. The survey's purpose was to assess: what happened to our students after they left their Los Rios college; whether their educational goals were met; how well programs and services offered met their individual needs; whether they were currently employed and where; whether they were working in fields related to their programs of study; whether they feel they were well prepared for employment; whether they have continued their education elsewhere; and whether they feel they were well prepared to do so. The survey population included all graduates and certificate earners for that year (including summer session) and a stratified random sample of non-returning students who had not graduated. Non-returning students were stratified by college; within each college they were stratified by gender, age and ethnicity. The following summary provides information regarding the survey population.

Summary of Responses: **SACRAMENTO CITY COLLEGE**
